Cover Letter

Dear Recruitment Team!

I'm interested in the position of Site Cybersecurity Officer (21000BFG) as I could use the experience and knowledge, I got from the years I spent in the army as information security officer I would like to continue my career development in the cybersecurity field in the civilian/corporate area. I am located in the city of the site of the position (Veszprém) and got good feedbacks about the company.

I'm working at Hungarian Defense Forces since 2004 in different positions, specialized in Information security in since 2017. In my position as information security officer my duty is divided between open and classified systems, maintaining level of security, developing new systems, auditing new and already in use systems. Also as part of my duties is to maintain the level of information security awareness of the unit, hold awareness trainings and investigate security incidents. In relevance of the classified systems, I'm responsible for the cryptographic equipment, networks and implementing new systems. As information security officer, I was responsible of creating and implementing the unit's Information Security Management System.

I participated in 5 abroad NATO and EU missions, last time in 2019 in Lithuania at Baltic Air Policing as information security officer.

Kind regards

Gergely Zámbo
